

Eyebrows, The Watcher

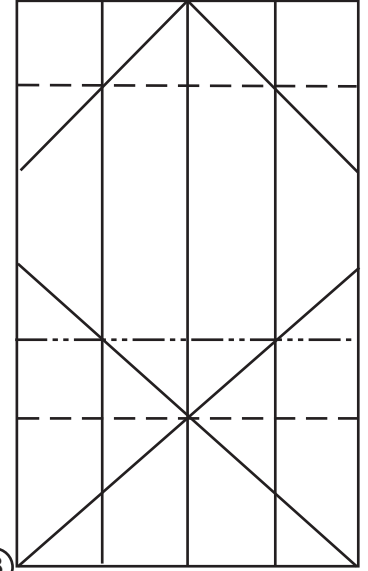

An Origami Doodle, Made with a 3x5 Index Card
By Perry Bailey © 1998

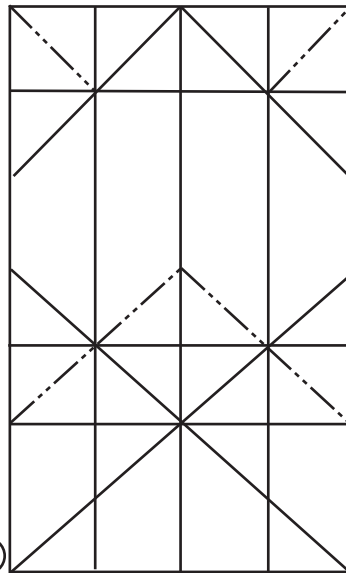

① Fold the index card in half, then fold the sides in to the center. Unfold.

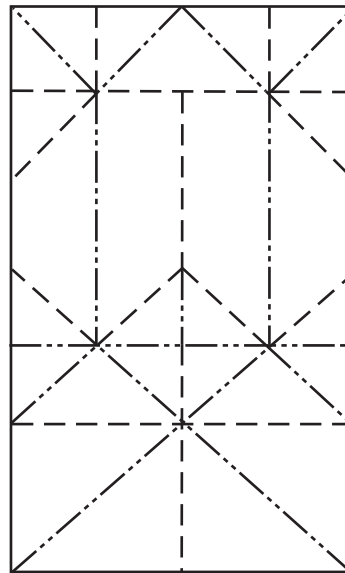

② At the top fold the corners to the center, unfold. Then fold the corner on bottom to the side unfold do the other bottom corner.

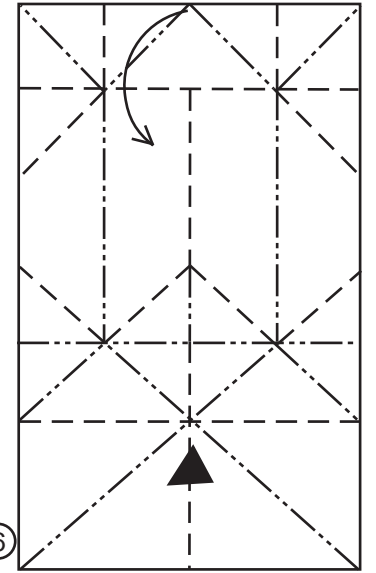

③ Valley fold at top where lines converge, fold the top where the lines converge as well, unfold.

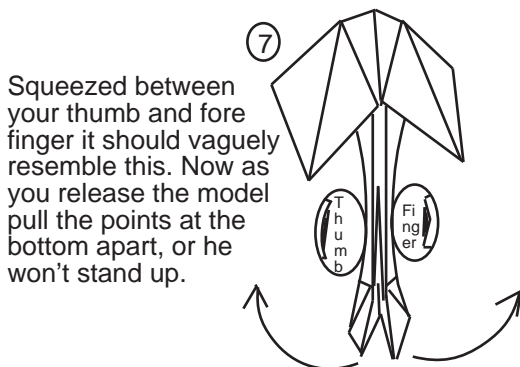

④ Fold as indicated.

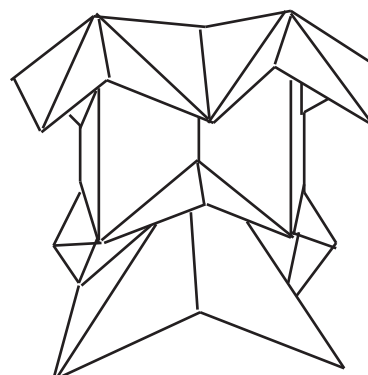

⑤ This shows a map of all the creases in the fold, make sure they match on the model.

⑥ This is where everything comes together, fold the top down, before you pinch the sides together push the bottom part marked with the pointer up into itself as you squeeze the model together.

Squeezed between your thumb and fore finger it should vaguely resemble this. Now as you release the model pull the points at the bottom apart, or he won't stand up.

And here he is, eyebrows, The Watcher!!!!

Created in honor of children everywhere who drive adults nuts, just by watching them.... PVB
